This screenshot shows a geospatial analysis interface. At the top, there's a 'Mask Manager' panel listing several mask types: 'aoi 1\_Polygon', 'aoi 2\_Polygon', 'aoi 3\_Polygon', 'Not Sargassum', and 'new\_ma... Range'. The 'new\_ma... Range' entry is selected, showing a range from 0.4 to 1.0. Below this is a 'Spectrum View' plot showing reflectance values from 0.00 to 0.14 across wavelengths from 450 to 850 nm. A 'Compute Mask Area' dialog box is open, displaying statistical information about the selected mask. In the bottom left, a 'World View' window shows a small inset map. The main workspace displays a grayscale satellite image with a white polygon highlighting a specific area.
